

HOME BUILDERS & LANDSCAPERS GUIDE TO EQUIPMENT

WE'VE GOT WHAT YOU NEED TO GET THE JOB DONE!

Agriculture Tractors

- Offering full front and rear suspension for an unparalleled ride, comfort and traction.
- External disc brakes offer excellent heat dissipation and greater performance than the oil-immersed systems found on conventional tractors.
- Unique full chassis construction is designed for strength, stability and load carrying ability.
- Center-mounted cab reduces any jolts and helps to achieve near-50/50 weight distribution, making the operator more comfortable and more productive.

Backhoe Loaders

- Efficient, productive and versatile - perfect for municipalities and general construction work.
- Gives you the versatility of a standard backhoe with ultimate maneuverability which allows minimal disruption and maximum productivity.
- From digging to lifting and maneuvering - these machines will help you complete your project with efficiency.
- Ideal for just about any application, from road-building to house-building, landscaping and snow clearing.

Compact Excavators

- Incorporates five key characteristics: comfort, controllability, reliability, serviceability and performance.
- Provide precision control, unrivaled service access and an exceptional operator environment - ideal for size restricted job sites.
- Quick, powerful, productive, and easy-to-operate and control.
- Well designed, particularly when it comes to stability and power.

Compact Track Loaders

- Class leading safety and manufactured with single boom and side door entry.
- 270° visibility. 60% better than competitive models.
- A cab size 46% larger than the average competitive small platform compact track loaders.
- 24% better serviceability on large platform compact track loaders, 21% on small platform compact track loaders based on SAE Service Audit scores.
- The most efficient skid steer on the market, with up to 16% better fuel consumption.

Compaction Equipment

- Manufactured to world-class standards for trench rollers, double drum or tandem rollers.
- Delivers unrivaled quality and reliability from 0.7 to 3 ton.
- Superb performance, durability and serviceability to make soil compaction applications simple.
- Comes with a smooth or padfoot drum and other options.

Excavators

- ME (Mass Excavation) models for high output and XD (extra duty) for added protection in tough environments.
- Industry-specific HRD (High Reach Demolition) models.
- Long reach work equipment allowing clearing of irrigation canals and ditches.
- For house building, construction, rental, engineering, rail construction and site preparation, they are easy to use and compact, with excellent visibility, power boost and lift capabilities.

Rough Terrain Forklifts

- Perfect for virtually any rehandling environment from docks to yards, timber forestry, construction sites, farms and builders' merchants.
- Designed for high mobility and superb productivity in rough terrain areas.
- Range of operating weights, lift capacities and dimensions to suit, and they're all powered by our world-renowned efficient EcoMax engine.
- An innovative transmission system provides fast directional changes, great performance and superb traction.

Skid Steer Loaders

- Class leading safety and manufactured with single boom and side door entry.
- 270° visibility. 60% better than competitive models.
- A cab size 46% larger than the average competitive small platform compact track loaders.
- 24% better serviceability on large platform compact track loaders, 21% on small platform compact track loaders based on SAE Service Audit scores.
- The most efficient skid steer on the market, with up to 16% better fuel consumption.

Telescopic Handlers

- Compact models for accessing restricted sites to a 4.1-ton payload, 55 ft 9 in (17m) lift height machines.
- A wide range of compactible attachments are available for these versatile machines.
- Designed for ultimate maneuverability and feature 3 steer modes.
- Features the world-renowned EcoMax engine.

Teleskid

- The only skid steer or compact tracked loader with a vertical reach of over 13ft and a forward reach of 8ft.
- The only skid steer on the market with true bi-directional and extendable parallel lift.
- High strength steel boom mounted on a single-piece fully welded chassis.
- Easy side door entry, the largest cab on the market and electric over hydraulic controls.

Teletruks

- Forklift truck with a telescopic boom instead of a vertical mast.
- Design dramatically improves site safety, saves operational time and yard space.
- Forward visibility, forward reach and large lift capacity on a compact machine.
- Enables you to change attachments quickly and easily and its 111 degree carriage rotation allows you to pick and place loads safely.

Wheeled Excavators

- More maneuverability and versatility than tracks can offer.
- Ideal for everything from road preparation and repairs to stock yard rehandling.
- Built for reliability, productivity, durability.
- Capable of independent road travel.

Wheel Loaders

- Safety, efficiency, ease-of-use, ease-of-maintenance, productivity, performance, reliability and comfort.
- Models from compact, hydrostatic drive 5-ton/11,000 lb models, to giant, 24-ton/53,000 lb powershift machines.
- Big power, big torque, a high power-to-weight ratio, powerful breakout forces and excellent traction.
- Wide ranges of options and attachments.
