## PUMP OUT SERIES

The pump out series of vacuums are general purpose vacuums that can be used in wet application with added productivity of automatic discharge. Can be used in water recovery applications where a greater amount of water is collected. They are an excellent choice for concrete grinding, marble sanding and flood recovery.

The series use an incorporated discharge pump to automatically discharge recovered water at a rate of 48 gallons per minute with a 25' vertical rise. They are available in durable polyethylene tanks that won't dent or chip or chemical resistant steel tanks that won't crack or corrode.
