## + TASK COBRA® HEAVY DUTY LEGLESS® STACKER

### POWERFUL LEGLESS® STACKER.

The COBRA® Heavy Duty Legless stacker is available in capacities up to 4400lbs, making the COBRA® Legless® stacker a true 2 tonne unit.

The electronic power steering makes the COBRA® simple and easy to operate; the recommended three stage "full free lift" mast is an ideal solution for users working within tight height restrictions.

The unit comes as standard with a tilting mast and side-shift allowing operators to maneuver pallets and materials safely, and more efficiently.

### DURABLE & EFFICIENT

The COBRA® is supplied with a 510AH industrial battery. This allows operators multiple shift use before needing to recharge the unit using 110v single phase charger.

All the functions including lift and lower are controlled using Task's VTC (Variable Total Control) module. This provides users with absolute control when operating the COBRA®.

### CURTIS® CONTROLLED.

The Curtis® Programmable Control System with Multi-mode allows infinite control of all machine functions.

Authorized TASK® support technicians are able to adjust and optimize settings to meet environmental requirements or different operator skill levels.
