## NEW FULL SIZE ROUGH TERRAIN SCISSORS

## BIGGER. BETTER. SKYJACK.

## ALL NEW Range of Class-Leading Full Size Rough Terrain Scissors Lifts.

The decision to move to increased platform heights was to compliment the growing trend towards urban intensification with taller buildings, higher siding, and more work at increased heights. This new Full Size Rough Terrain range makes work at six stories, with 11.5 ft floor-to-floor possible. Platform heights have increased to $33^{\prime}, 43^{\prime}, 53^{\prime}$ and $64^{\prime}$ respectively. Platform capacities have also increased across the series and range from $1,200 \mathrm{lbs}$ up to $2,750 \mathrm{lbs}$.

While the models themselves are new, the design philosophy behind them remains unchanged. Skyjack has continued its focus on serving the needs of the rental industry by delivering a range of machines that maintain the Skyjack ideology of providing industryleading lifecycle value.

The new range still boasts features that are associated with Skyjack, including an axle-based four-wheel drive, commonality of parts throughout the range, and attention to accessibility for service. It's these core competencies that keep the cost of ownership down and the new range positioned as an industry leader in all-terrain performance. Owners and operators alike will appreciate the improvements Skyjack has made on these new machines.

These attributes combined with a full range of ACCESSORYZERS ${ }^{\text {TM }}$ make bringing materials to height less strenuous, while significantly improving utilization for our customers.

## SKYCODED

## COLOR CODED AND NUMBERED WIRING

At the heart of every Skyjack machine is our proven and simplistic control system. Skyjack's color coded and numbered wiring system makes our machines the easiest to troubleshoot and repair, this translates into less maintenance and lower costs for our customers.

The control system on the new Full Size Rough Terrain Scissors Lifts may look different, but provides the same simplistic reliability. The wiring system is still color coded and numbered and that simplicity has been reinforced with a single control module that manages all machine functions (except for emergency lowering). A visual display module at the base control box provides an easy to navigate interface - outputting plain text and easily understood codes.
skYGODED.

EVERYTHING OK

## OPTIONAL FEATURES

## elevate

## MORE THAN TELEMATICS

ELEVATE provides the actionable insights to make your business more efficient. Skyjack has worked with customers to identify and provide the most important data points that solve day-to-day pain points in rental service and management.

Beyond hours and location provided by basic telematics systems, ELEVATE delivers machine specific alerts and analysis which can dramatically reduce unnecessary service calls and trips to site for diagnostic work.

These Skyjack specific group of features deliver immediate impact for your business:

[^1]

It's operators and site supervisors that determine how your machine is treated. These roles need data to make the right decisions to get the work done, and to take care of your machines.

ELEVATE Live provides machine specific telematics data, as well as machine specific familiarization and documentation.

To the operator.
At the machine.
When it's needed.

Strictly relevant data like battery charging guide, battery life remaining, and active fault codes are provided to operators at the machine instantly via a QR code scan.

Machine documentation like emergency lowering procedure, visual pre-check guide, familiarization videos are all there with the tap of a finger. No downloading an app. No username or password required.

## ACCESSORYZERS

Skyjack's approved accessories are designed to add functionality to your machine and convenience for the operator.

## AXLDRIVE SUPERIOR TRACTION

Skyjack's AXLDRIVE ${ }^{\text {TM }}$ is a highly efficient, true mechanical four-wheel drive system which, when combined with a selective differential lock, provides unmatched traction and up to $40 \%$ gradeability. Compared to other manufacturer's machines, there is a significant reduction in the number of hydraulic connections, which results in lower maintenance needs and more uptime. This industry-leading terrain capability means one can use Skyjack Full Size Rough Terrain Scissors Lifts in the most challenging of conditions.

## SMARTIORQUE

Skyjack's new Full Size Rough Terrain Scissor Lifts feature an optimized balance of engine horse power, torque, and hydraulic performance. By adjusting axle gear ratios and maximizing hydraulic output, the new models are able to provide excellent performance with less engine horsepower. An optimized lower horsepower engine not only benefits performance but keeps cost down - both upfront acquisition and maintenance. Less emission controlling components avoids the cost associated with their complexity, as well as the time and inconvenience required in maintaining them. SMARTORQUE ${ }^{\text {TM }}$ means no Diesel Particulate Filter (DPF), no Diesel Exhaust Fluid (DEF)/AdBlue, and no other active exhaust after treatment. The new Full Size Rough Terrain Scissors are Tier 4 Final compliant.
