COMPACT FORKLIFT SOLUTIONS

YOUR SOLUTION FOR NARROW AISLES

The **MIP 10** stand-up counterbalanced electric forklift delivers superior operator comfort without compromising on performance. With fully adjustable armrests, intuitive finger-touch controls for all-day precision, and two drive mode positions, you can enjoy unique operational flexibility that adapts to your warehouse—not the other way around.

> SUPERIOR MANEUVERABILITY

The MIP 10 effortlessly maneuvers in **narrower aisles** compared to leading models, allowing you maximize storage density. This **stand-up counterbalance** prioritizes ergonomics and ease of operation with its revolutionary operator-focused control. It's also fully adjustable for operators of nearly any size.

> UNCOMPROMISED CAPACITY

Unlike some narrow-aisle counterbalance stand-ups that sacrifice lifting capacity, the MIP 10's unique configuration **maintains capacity** when compared to forklifts with a traditional mast. This means you don't have to choose between space efficiency and the ability to handle heavy loads.

SPECIFICATIONS & FEATURES

PERFORMANCE

Capacity: 2,200 lbs. at 24" load center

Dimensions:

Length: 49" | 51.5" with side shifter

Width: 33.8"

Lift Height: Up to 211.8"
